Creativity through the Visual
Arts
Putting It All Together
Much, much more!

Fundamentals of Creativity
What is Creativity?

The dictionary meaning of the word creativity is this: to use or think of new ideas, concepts or objects that are unique and purposeful. However, creativity is more than just the production of new ideas. Creativity is a state of mind wherein you are able to fuse several old concepts to create something completely new. Being creative means being able to think outside of the norm, bringing fresh perspective to solid norms. A creative person can look at a glass, for example, and see several potentially new creations with that glass as the base. The glass can become a telescope, a pen holder, an experiment container, or anything else. The imagination of a creative person is limitless and fearless.

Creativity does not begin and end with the fine arts, as many people have come to believe. In fact, the fine arts are just one avenue for the creative person to explore. Also, creativity is not only confined in a private studio, library or music chamber. Creativity lives in the streets through graffiti artists, in nature through the beauty of flowers and the majesty of trees, and even in corporate buildings where cutting-edge design and high functionality are the fruits of the artistic endeavors of several individuals. With so many fields for creativity to grow in, it is no wonder that companies hold innovative people with high

regard. Creative people birth the inventions, books, food, machines, and so many other things that make our lives more exciting, comfortable and adventurous. Creative people are the world's main source of energy for change and progress. Take action today and download this book for a limited time discount
