

Wait! Before you just skim through this and then move on, I want to tell you that this is NOT just another book about “How to Outsource.” There are plenty of places to go for free information about how to hire someone to do work for you and your online business. They will mostly tell you to go to a website, post a job, screen the candidates, make your choice, and then give them a bunch of things to do in order to “bring your business to the next level.” Yeah, we’ve heard and read all about that too! And, that’s exactly why I’m bringing you a different kind of book about Outsourcing your business to success. While the information that they provide is mostly correct about the process, it is grossly lacking in the real “meat” behind hiring talented people. Just finding someone to do work is not going to give you the type of success that you really crave. If that were true, then I could argue that “YOU” are talented in whatever it is you do, right...so why isn’t your business as Amazingly Successful as you KNOW it could be? Because it really takes a lot more than people who are capable of doing “tasks” and “projects.” It takes the same kind of business knowledge that successful companies have used for decades. Don’t get fooled into believing that online business success is a new fangled idea that we’ve all got to figure out so you need to chase after all those shiny red balls, known as distractions, in order to move your business into the neighborhood of profit. There are some simple, basic business truths that you’ve got to fully understand before you will be successful. Then, you need to know which tools to use, and how to use them,

so that you dont waste an ounce of energy. If you want to know how to run a business where every person on your team is working toward your success...then this is the book for you!
